

As Africans, we may be confused about a lot of things with respect to COVID-19, but we are NOT confused about the leadership we want from our Governments during this pandemic.

1. We want Leaders who can **re-imagine and build back our** countries better, stronger and fairer.
2. We want Leaders that **engage their citizens** in responding and recovering from the pandemic.
3. We want Leaders that build **trust by being transparent and accountable** on actions taken and resources used to respond to the pandemic.
4. We want Leaders who protect **the poor and vulnerable** from the pandemic and its impact.
5. We want Leaders who listen to and **empower women and young people** in the response & recovery from COVID-19.
6. We want Leaders who are **decisive, proactive** and make decisions based on science and data.
7. We want Leaders who **talk truthfully and regularly to** their

*"Tell no lies, claim no easy victories and hide nothing from the people" Amilcar Cabral*

citizens about what they are doing as a government to respond to the pandemic.

8. We want Leaders who are **courageous** and **ethical** enough to stop looting and stealing of the public resources urgently needed to respond & recover from the pandemic.
9. We want Leaders **who have learned from the mistakes** of COVID & are committed going forward to making a serious investment in key sectors such as **health, education and agriculture.**
10. We want **pan-African** Leaders who look to the continent for solutions and partnerships to respond to the pandemic.

***This is the Leadership We Want.***
